MICROENCAPSULATED MICRONUTRIENT (IRON 12%)

PRODUCT FEATURES

- Plant essential nutrient Iron (12%) microencapsulated with vegetable proteins.
- Water soluble powder formulation that provides Iron to correct deficiency.
- Prevents positively charged minerals from binding with negatively charged leaf and soil surfaces and adsorption into soil.
- Formulation delivers iron efficiently into plants and vegan peptides are instantly used in nitrogen metabolism.
- Provides mineral nutrition, support cell division, carry oxygen and supports chlorophyll synthesis.
- Prevents plant diseases associated with Iron deficiency.
- Provides nutrition to beneficial microbial population when applied in soil.
- Compatible and synergistic with nutrients and crop protection products.
- The product is recommended in foliar and soil applications.

PRODUCT BENEFITS

- Corrects Iron deficiency, enhances chlorophyll synthesis, growth and yields.
- Prevents plant diseases associated with Iron deficiency.
