ECOESSENTIALS[™] WSP

MICROENCAPSULATED MICRONUTRIENT (COPPER12%)

- Plant essential nutrient Copper (12%) microencapsulated with vegetable proteins.
- Water soluble powder formulation that provides Copper to correct deficiency.
- Prevents positively charged minerals from binding with negatively charged leaf and soil surfaces and adsorption into soil.
- Formulation delivers copper efficiently into plants and vegan peptides are instantly used in nitrogen metabolism.
- Provides mineral nutrition, aids chlorophyll production, photosynthesis, enhance sugar content, improves color and enhance flavor.
- Prevents plant diseases associated with Copper deficiency.
- Provides nutrition to beneficial microbial population when applied in soil.
- Compatible and synergistic with nutrients and crop protection products.
- The product is recommended as foliar and soil applications.

PRODUCT BENEFITS

- Corrects Copper deficiency, enhances growth and yields.
- Prevents plant diseases associated with Copper deficiency.

PRODUCT USE RECOMMENDATIONS

- ➡ Foliar use: Apply 2-8 OZ/ acre (60-240 gm). Applications may be made 2-3 times during crop season. Use 12 OZ/ acre (360 gm) for deficient crops.
- □ Drip use: Apply 2-8 OZ/ acre (60-240 gm). Applications may be made 2-3 times during crop season. Use 12 OZ/ acre (360 gm) for deficient crops.
- Sprinkler use: Apply 2-8 OZ/ acre (60-240 gm). Applications may be made 2-3 times during crop season. Use 12 OZ/ acre (360 gm) for deficient crops.
- Container and Nursery Plants: Apply 1-4 OZ/ Gallon (30-120 gm) water as a soil drench application.
- Turf: Apply 1-2 OZ per 1000 sq. ft. (30-60 gm)
- Use in conjunction with regular crop nutrition programs.

RECOMMENDED CROPS

Recommended for all crops including vegetables, fruit trees, nut trees, row crops, feed and forage crops, ornamental trees, flowers, shrubs, container plants, turf and public greens.
